**Subject:** Your request for a search in case 09/484,721

Hi,

In response to your request for a search in our area which covers class 710 and 713, I reviewed the claims you faxed to my rightfax and performed a search. I did not find any prior art containing a table or list containing relations or correspondance between hardware addresses and a plurality of management points and flags indicating old terminal equipment being used or not. Here is one reference you might want to look at. However, it is not pertinent to your art. Patent no. is 6,611,547. I hope this helps. Thanks,

Rehana Perveen
